

Exploring the fascinating world of maritime archaeology

Shipwrecks and Submerged Worlds

Join a global community and be guided through humanity's changing relationship with the world's oceans and seas over the last 2.5 million years.

We invite you to join our unique, free, interactive course with world leading archaeologists from the University of Southampton's Centre for Maritime Archaeology.

Over the four weeks of this online course we will learn about maritime archaeology together – exploring underwater landscapes from the ancient Mediterranean to the prehistoric North Sea and shipwrecks from around the globe.

We will chart the development of seafaring and our relationship with the changing marine environment as well as examine the impact that shipwrecks have had on our understanding of past societies.
